

Madrid (2016)

Wednesday 30th March we visited the most typical places of Madrid. For example, we went to the “Plaza Mayor” and the “Puerta del Sol”.

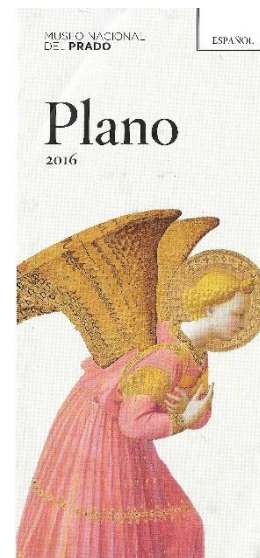

The “Museo del Prado” and “El Palacio de Cristal” were the two sites that I liked most.

· Museo del Prado:

This is one of the best museum art in the world. There, we can find the biggest collection of Spanish, Italian and Flamish painting.

Before lunch we visited the museum. Although I was hungry, I wanted to visit it. I really liked the visit because I could see many pictures I had never seen. We made two groups and while some groups visited the museum, the others rested in a park. When all groups just finished the visit of the museum we went to the “Plaza Mayor” and then we had lunch.

This activity has made me more curious about art and I made enquiries relating the new information of pictures.

· Palacio de Cristal:

It's a metal and glass structure, in the “Parque del Retiro” and it was built in 1887.

We had little time and we were very tired. However, we visited the park. This is the biggest park I've ever been to and the “Palacio de Cristal” was really beautiful.

By chance we found an ice cream shop and we bought a snack. We wanted to walk but, as we were so tired, at least we relaxed on the grass. Later, we went to the meeting point and then we went to visit the “Reina Sofia” museum.
